

Product Name :Electronic Components / Wire harness / Wire Harness
Product Code : Wire Harness

Specifications

Wire Harness Wire harnesses are compactly bundled wires & circuits that function as the central nervous system of any Electrical System. Elcom offers critical wire harness for a wide range of applications, including medical equipment, Industrial control panels, consumer appliances, and solar applications, etc.. Elcom's Wire Harnessing capability is built upon an integrated approach towards design, development, prototyping, validation throughout the entire development period. Its Wire Harnessing offering includes cable sizes ranging between 0.08~185 sq mm and applies best practices using automated & semi automated Cutting-Stripping-Crimping Machines,. The continuous focus on high quality products and processes enables ELCOM to provide the best possible connections to its esteemed customers. Our manufacturing system is well equipped to assure that our customers can expect the best-in-class customised solutions and hence high degree of performance and reliability.
